

Having Trouble
Getting Blood to
Test Your
Diabetic Dog?

HMS Medical⁺

Specialising in patient transfers

Pet owners can find it difficult to monitor their pet's blood sugar levels from home. This means that most pet owners have all diabetes monitoring done at the vet, which can run up the already expensive costs of owning a diabetic pet.

Monitor your pet's diabetes from the comfort of your home

Genteel

No more visits to the vet just to test blood sugar, now test at home with Genteel with **NO PAIN** for your pet.

As a pet owner you may find it difficult to monitor your pet's blood sugar levels from home. This means that most pet parents have all diabetes monitoring done at the vet, which can run up the already expensive costs of owning a diabetic pet.

Genteel allows pet owners to easily check blood glucose levels at home!

Testing at home helps you and your vet determine the best way to regulate your pet's diabetes without having to make multiple trips to the vet.

Knowing if a pet is experiencing a 'high' or 'low' without an emergency trip to the vet can not only save money, but can also mean it is more comfortable managing their diabetes at home. By testing more frequently pet owners have a better snapshot of what is causing changes in blood sugar and can help the vet and the owner come up with the best treatment plan for the pet.

1. Contact Tips control the depth of lancet penetration. Depth is controlled by 6 different colors, Blue, the shallowest, through to Violet, the deepest.

4. The Activation Button when pushed and covered with your finger engages the vacuum. The longer the button is pressed, the more blood will be drawn to the surface

2. Nozzles hold Contact Tips securely in position and provide a clear view of the drop of test blood being formed inside.

5. The magic of Genteel occurs because of the Vacuum Tube. Genteel creates a vacuum which pulls blood up from the lancet puncture. Because of its Contact Tips, the lancet only goes in as far as is needed to let the vacuum extract blood.

3. LANCET HOLDER

Butterfly lancets are a tri-bevel needle tip to minimise discomfort

6. The Piston Assembly is a combination of the Push Shaft, Push Cap, and red Vacuum Indicator. It is used to prime and help indicate if the vacuum is still active.

Most diabetic pet owners don't test at home because the difficulty with getting enough or any blood at all. Genteel makes testing at home easier because our patented vacuum helps by drawing the blood to the surface. No more wasted test-strips, get the perfect amount of blood the first time.

Quik Vac

Bean Bag Positioners

ARTG: 155852

- The Quik Vac is a safe method for positioning and stabilising animals undergoing procedures.
 - Various sizes can accommodate different procedures and animals.
 - They conform comfortably to give stability and support.
- Suction is used to stabilise and retain the bean bag shape that will hold the animal securely.
 - By opening the valve, the bean bag softens and the animal can be repositioned.
 - Quik Vacs are easily wiped over with PH Neutral detergent or wipe.
 - 1 Year manufacturers warranty.
 - Radiolucent.
 - Latex Free.

Absorbent Coversheets

Pinkies & Ultras

Pinkies.

Absorbent Bed Covers for when Fluid management is critical.

Have a Waterproof backing with a super absorbent “quilted” pad. The quilted pad draws the fluid away from the patient’s skin, leaving them dryer.

3 sizes.

Large - max 4 litres

Medium - max 2 litres

Small - Max 1.5 litres

Disposable and Latex free.

Code	Dimensions	Box Quantity
ABC 001	Large - 1800mm x 600mm	24
ABC 002	Medium - 900mm x 600mm	50
ABC 003	Small - 600mm x 600mm	80

ABC Ultras

Ultra size and Ultra absorbent

Have a Waterproof backing with a super absorbent “quilted” pad. The quilted pad draws the fluid away from the patient’s skin, leaving them dryer.

Extra large size to give full bed, operating table or trolley coverage.

One size which can hold upto 12 litres of fluid.

Disposable and Latex free.

Code	Dimensions	Box Quantity
ABC-Ultra	2250mm x 1030mm	20

LED-9500 HEADLIGHT SYSTEM

This is the product surgeons have been waiting for. The Surgical LED Headlight that offers portability, quality light and brightness to match.

With the new 70,000 LUX output, the Sunoptic Surgical LED-9500 is providing 50% more light than major competitors headlights. The quality of the light appearing in the spot is unmatched in any other LED on the market! The LED-9500 features even distribution of its all white light, eliminating the unusable brown and yellow edges seen in other LEDs. With the spot size expanded to 110mm the LED-9500 now has a spot size to compete with any other brand.

The 'RCS' headband is Lightweight and Comfortable
10w LED offers the BRIGHTEST Illumination available

Module with variable spot size: 20mm-110mm @ 16"

Light Intensity: 70,000 Lux @ 16"

Lightweight battery and clip on holster provide
3hrs of continuous use

Audible warning when battery life is low

Integra LED vs Sunoptic Surgical LED-9500

The wider spot diameter, increased light output, and the uniform white light throughout the spot will bring the LED-9500 much closer to the industry standard of xenon headlights.

In keeping with the new industry expectation the NEW Sunoptic Surgical LED-9500 Headlight is simple in design, light in colour to allow for visualisation of any debris or blood splatter and is easy to clean.

Our focus is surgical headlights

LED-9500 HEADLIGHT SYSTEM

SPECIFICATIONS

10w LED Producing Bright, White Light
Colour temperature: 4,500°K
Colour Rendition Index (CRI): 75
Typical LED life: >50,000 hours
Lightweight Headband with Rear Cranial Support for added comfort
Variable Module Spot 20mm-110mm @ 16"
Variable Intensity Control: 0 – 70,000 Lux at 16"
Headband with LED Module Weight – 9 oz
Battery and Holster Weight – 12 oz
Battery Life – 3 hours at full intensity, 6 hours at 50% intensity.
Battery Charger Accepts 100-240V AC, 50/60 Hz input for worldwide operation
Battery Recharge Time – 3.5 hrs
Warranty Three (3) Years on LED Headlight and (1) year on Batteries
Classification: European Class I, Active device per Annex IX, rule 1
FDA Class I, Device Listing 125713
Complies with Essentials Requirements Matrix of MDD 93/42/EEC, amended by 2007/47/CE

SYSTEM INCLUDES

1 LED Headlight with Rear Cranial Support 'RCS' Headband
1 Clip-on Battery Holster
2 Rechargeable Batteries
1 Double Bay Battery Charger
2 Garment Clips
1 Padded Carrying Bag with Shoulder Strap

Our focus is surgical headlights

LED-5500 HEADLIGHT SYSTEM

The new LED 5500 Battery-Operated headlight is Sunoptic Surgical's first low-cost LED headlight. It features a wireless design with no remote battery packs or cables. The battery is attached to the headband which allows for easy replacement during surgery. The wireless design also allows unlimited mobility for the surgeon in the operating room.

No external wires or batteries

Quick change battery accessible on headband

Newly headband design distributes weight for maximum comfort

30,000 lux output at 40cm distance with a bright, clean, uniform spot

Infinitely variable output switch on side of headband allows surgeon to set different light outputs which translates into longer battery life.

20-110mm spot variability at 40cm working distance

4 hour battery life for fully charged battery at maximum output and 4-5 hour recharge time

Low-battery indicator clearly visible on side of headband

Colour temperature 4,500° K

Colour Rendering Index (CRI) 75

MedLED MC7 vs LED-5500

The wider spot diameter, increased light output, and the uniform white light throughout the spot will bring the LED-5500 much closer to the industry standard of xenon headlights.

In keeping with the new industry expectation the NEW Sunoptic Surgical LED-5500 Headlight is simple in design, light in colour to allow for visualisation of any debris or blood splatter and is easy to clean.

Anti Fatigue Ortho Mat

Antimicrobial Ortho Mat prevents bacterial growth and is impervious to acids, chemicals, oils. The closed cell feature eliminates the absorption of liquids, fluids and airborne pathogens.

Ortho Mat is complete with safety bevelled edges and is non allergenic, latex and silicone free, making it suitable for operating theatres, laboratories, food preparation and industrial areas.

The Mat reduces exposure to prolonged cold, heat and vibration and their ergonomic design reduces the risk of back, leg, foot and ankle fatigue. The non-slip mats are lightweight and easy to clean.

- Raw Material Fabricated from superior closed-cell, virgin Nitrile rubber with an antimicrobial compound added as part of the manufacturing process to prevent mould, mildew and bacterial growth.
- Edge Bevelled on all sides for ease of cart traffic and added safety
- Pattern Aggressive top and bottom for oily areas.
- Colours Black
- Non-slip properties Excellent- Suitable for wet or dry applications as well as oily and slippery surfaces. National Floor Safety Institute approved – non-slip quality tested 40% higher than any other sponge mat.
- Burn Test UL94 HBF self-extinguished in 10 seconds, burned 6mm
- Chemical Resistance Excellent. The Ortho Mat® is impervious to all chemicals, petroleum products and animal or vegetable fats.

Cleaning

- Can be cleaned with ammonia, bleach, chlorine, or acid based cleaners and it can also be steam cleaned. (Maximum temperature of 121°C)
- For disinfectant cleaning follow your normal protocol
- Life Expectancy: 3-8 years.
